

TEC3000 Electric Fan Coil Thermostat

Touch Screen Smart Thermostat

Once again, a thermostat designed by Johnson Controls delivers an innovative approach to controlling comfort and efficiency.

The TEC3000 Series delivers advanced functionality and easy access to powerful control and networked solutions.

The intuitive 4,2" touchscreen provides fast and easy configuration and real-time control status.

Models with the built-in occupancy sensor can achieve up to 30% energy savings in high-energy usage commercial buildings, such as schools and hotels.

- Ideal for rooftop, fan coil and heat pump equipment
- Stand alone or networked solution
- Programmable scheduling for savings and comfort
- Clear touch screen password protected
